

MISSIONS COMMUNIQUE

OCTOBER 2017

Impact Colorado

Northglenn Christian Church is proud to honor their missions and missionaries individually each month. October is IMPACT Colorado at CSU and UNC. This mission is unique in that it is one mission on two college campuses! CSU in Ft. Collins, CO was first, then expanded to include a neighboring community in Greeley, CO on the campus of UNC.

Austin Ballard is campus minister at CSU, and Trevor Petty is the director of campus ministries at UNC.

IMPACT COLORADO: The big news at Impact @ CSU is the new football stadium, which is directly across the street from the Impact campus house! Austin writes that now more people are finding them everyday. He continues with, there are plans for block parties, tailgating, and other events focusing on food and fun while connecting with students and community members on game days, instead of selling parking. As this season progresses, Impact@CSU, has joined forces with other ministries and will be trying various events while gaining insight to the game day culture and dynamics. They hope that the community will become involved as well. They are also fundraising to update the campus house. Many small projects have been completed over the summer. Austin asked for prayer and financial donations as they have collected only about 1/3 of what is needed to accomplish this goal. NCC supports this mission with a monthly donation. Austin closes by writing in the fall newsletter: "we are excited to serve our campus and community and cannot wait to see you at a game!"

IMPACT@UNC: Trevor writes that it has been a fast 5 years with this ministry! This semester they have moved their meeting place to a coffee shop across the street from the campus. Many students are excited with the location change. A campus house is being discussed. Trevor asks for prayers for wisdom, guidance, and creativity as the planning progresses for this project. Gratitude is always sent in the monthly letters from students involved with Impact. www.impactingcolorado.com
